

Team Meetings

Date: October 7th, 2021

Attendees: Michael Turner, Ross Morrison, Brent Armeneau, Ben Fitzharris

Absent:

1. Project

Progress

What we worked on this week. Organize by task/activity. Name which students worked on each task/activity

- Second Client Meeting.
 - Questions for Client
 - Ben
 - Ross
 - Notes from Meeting
 - Ben
- Second Meeting with Professor
 - Explanation of tasks from previous week
 - Everyone
 - Questions for Professor
 - Michael
 - Notes from Meeting
 - Michael
- Explorations
 - Exploration idea #1: Frontend Framework
 - Ross
 - Exploration idea #3: Dashboard UX Element
 - Michael
 - Exploration idea #4: Security/Privacy Requirements
 - Brent
 - Exploration idea #5: References to Dashboard
 - Brent
 - Exploration idea #6: Long-term goals
 - Ben

Blockers + Surprises

Things that impeded progress this week. Things that came up or were discovered that you didn't expect. Possible resolution strategies for moving forward.

- Backend framework isn't as expected
 - C Panel is used
 - May not work with Docker that we had planned to use before
 - www.okanaganwebhost.ca is outdated

- Will need to do some research to see if we can use the frameworks we planned to use
- Asked client to see if backend can be changed
 - If not, we should be fine to use framework with MySQL instead (however not ideal)

2. Learning Activity

Summary of your team's learning activity for the week. Name which students worked on it.

- Explorations
 - Backend Framework
 - Ross
 - OkanaganBCWebHost
 - Ross
 - Requirements presentation
 - Everyone

3. Plan

Task for this week:

What we worked on this week. Organize by task/activity. Name which students worked on each task/activity.

- Requirements presentation
 - Create DFD
 - Ben
 - High-level description and target user groups
 - Brent
 - List of functional requirements for each milestone
 - Michael
 - List of non-functional requirements
 - Michael
 - Tech stack plan
 - Ross
 - How to test the developed features of the system
 - Brent
 - Slides and voice recordings
 - Everyone
 - Compiled by Ross
- Work on Exploration tasks
 - Look into Frameworks
- Base Template file

Learning activities proposed for this week:

1. Backend Framework
 - a. MongoDB

2. OkanaganBCWebHost
 - a. Docker
 - b. MySQL

Goals for the next milestone:

1. Complete requirements presentation
2. Base Template for project
3. Figure out if we can use Docker
