

Team Meetings

Date: November 18th, 2021

Attendees: Michael Turner, Brent Armeneau, Ben Fitzharris

Absent: Ross Morrison

1. Project

Progress

What we worked on this week. Organize by task/activity. Name which students worked on each task/activity

- Work on Exploration tasks
 - Look into Frameworks
 - Michael
 - Ben
 - Brent
- Completed more designs of dashboard
 - Utilitarianism Page
 - Ben
 - Stakeholders Page
 - Michael
- Have working local database
 - Backend
 - Ross

Blockers + Surprises

Things that impeded progress this week. Things that came up or were discovered that you didn't expect. Possible resolution strategies for moving forward.

- Could not get started on implementing designs
 - Research into using the frameworks properly was not completed
 - Will have Ross create base template for other members to work off from
- Could not create test case for framework
 - Found that it was unnecessary
- Have not begun working on peer-testing items
 - Backed up on other non-completed tasks
 - Should be able to begin working on peer-testing items once frameworks are working

2. Learning Activity

Summary of your team's learning activity for the week. Name which students worked on it.

- Explorations

- Frontend/Backend
 - Michael
 - Brent
 - Ben

3. Plan

Task for this week:

What we worked on this week. Organize by task/activity. Name which students worked on each task/activity.

- Implement designs into project
 - Everyone
- Create user task for peer-testing
 - Everyone

Learning activities proposed for this week:

1. Backend Framework
 - a. Node
 - b. Express
 - c. Sequelize
2. Frontend Framework
 - a. React
 - b. Tailwind

Goals for the next milestone:

1. Finish implementations
2. Complete setup for peer-testing
