Team Meetings

Date: October 28th, 2021

Attendees: Michael Turner, Ross Morrison, Brent Armeneau, Ben Fitzharris

Absent:

1. Project

Progress

What we worked on this week. Organize by task/activity. Name which students worked on each task/activity

- Peer Evaluation
    - Done by everyone in the group individually
- Work on Exploration tasks
    - Look into Frameworks
        - Michael
        - Ben
        - Brent
- Start on base framework
    - Frontend/Backend
        - Ross
- Start design of dashboard
    - Draw out design template
        - Michael
        - Ben
        - Brent
        - Ross

Blockers + Surprises

Things that impeded progress this week. Things that came up or were discovered that you didn't expect. Possible resolution strategies for moving forward.

- Cancelled meeting with client
    - Did not have any questions for the client
        - Will try to work further into the project to get questions more quickly
- Could not set up backend on everyone's computers
    - Backend start completion was delayed
        - Will create better documentation and assist each other with screenshots of how to set it up

2. Learning Activity

Summary of your team's learning activity for the week. Name which students worked on it.

- Explorations

- o Find proper position of person who maintains website
    - ▪ Ross
- o Frontend/Backend
    - ▪ Michael
    - ▪ Brent
    - ▪ Ben

3. Plan

Task for this week:

What we worked on this week. Organize by task/activity. Name which students worked on each task/activity.

- Work on Exploration tasks
    - o Look into Frameworks
        - ▪ Michael, Brent, Ben
- Create base documentation of backend
    - o Allow for other members to be able to run the program on their machines
        - ▪ Ross
- Create Test Cases for dashboard
    - o Have frontend link with backend
        - ▪ Everyone
- Design of dashboard
    - o Draw out design template
        - ▪ Everyone

Learning activities proposed for this week:

1. Backend Framework
    a. Node
    b. Express
    c. Sequelize
2. Frontend Framework
    a. React
    b. Tailwind

Goals for the next milestone:

1. Finish design on dashboard
2. Have working test cases
